

# It's All About Me

By Albert Wolfe

## Verse 1

E            A                    B                    C#m    B  
Well I just won the Nobel Prize  
E            A                    B  
And I just fixed the hole in the ozone layer  
E                    A                    B            C#m    B  
But you'll never know and it's no surprise  
E                    A                    B  
'Cause you keep going on about your shoes, your nails, your hair

          G#m                            A  
And that's the way it always is  
          E                            B  
You would fail a friendship quiz  
          G#m                            A  
But let's switch roles today  
          E                            B  
Now I finally get to say

## Chorus 1

          E  
It's all about me  
                  A  
And who I want to be  
                  C#m  
And where I want to go  
                  B  
And what I want to see  
  
          E  
It's not about you  
                  A  
And all that you've been through  
                  C#m  
I know you'll never learn  
                  B  
So it's finally my turn  
          E  
It's all about me

E            A            B            C#m    B

E            G#m                            A

## Verse 2

E            A            B            C#m B  
I'm afraid I've started to regret  
E            A            B  
How we met ten years ago and you haven't stopped talking yet  
E            A            B            C#m        B  
You told me your life story, you've read me your whole blog  
E            A            B  
But you don't know jack about me, didn't even know I have a dog

G#m        A  
Well I've finally had enough  
E            B  
Sorry if this is tough  
G#m        A  
Been as patient as I can  
E            B  
But starting now, new plan

## Bridge

A            B  
I've got some breaking news  
E            B/D#    C#m  
I know it's sad but true  
A            B  
'Cause you think the whole wide world  
E  
Revolves around you  
  
A            B  
If the world's a stage  
E            B/D#    C#m  
You're a spotlight hog  
A            B  
But now it's your turn  
A            B  
To listen to my monologue

## Chorus 2

...

E  
It's not about you  
A  
So whatcha gonna do?  
C#m  
I knew you'd never learn  
B  
So it's finally my turn  
E  
It's all about me
